LIS Eligibility

Medicare offers financial assistance, or “Extra Help,” to qualified beneficiaries with limited income or resources. This assistance can reduce out-of-pocket (OOP) costs for eligible patients.

LIS eligibility is based on an individual’s income, asset level, and household size. The Federal Poverty Level (FPL), found here: https://www.healthcare.gov/glossary/federal-poverty-level-FPL/, is used to determine income level requirements for the LIS program.

LIS provides enrolled beneficiaries with assistance on Medicare Part D premiums, deductibles, and co-pays.

Quick Fact

In 2017, approximately 12.2 million Part D enrollees (29% of all Part D enrollees) were receiving LIS.

† Subsidy equal to 100% of the plan’s premium for basic prescription drug coverage or the regional benchmark, also referred to as the low-income premium.

‡ TrOOP = True Out of Pocket. Payments made by the federal government on behalf of the subsidy-eligible individual count towards the beneficiary’s annual out-of-pocket (OOP) threshold. Cost-sharing changes upon reaching the threshold: full subsidy-eligible individual cost sharing is reduced to zero; cost sharing for others is reduced to the corresponding calendar year co-payment amounts.

Patients who qualify for the Low-Income Subsidy benefit have no gap in coverage, also known as the “donut hole”
